

FORUM - ROOFTOP SOLAR FOR YOUR HOME OR BUSINESS

Are you interested in solar panels for your home or for your business? Have you been receiving telephone calls and emails from aggressive solar power installers?

This November, the Millis Energy Committee will present a forum to answer your questions on rooftop solar energy. It's a presentation with members of the Committee who have installed their own panels and a solar expert from the state's Clean Energy Center who will answer questions that you might have about your own solar.

There are many questions we all have about installing solar for our own buildings. How do I finance? What will the panels do to my roof? How much power should my system generate? Should I own or rent the panels? Will solar work when the grid goes down? What about federal and state tax breaks?

Rooftop Solar Panel Forum
Thursday, November 8th
7:30PM

Room 229 (Board of Selectmen's Meeting Room)
You'll also be able to view the Forum on Millis Cable
